# **HOTEC.coop/SmartHub**

# YOUR ACCOUNT INFORMATION AT YOUR FINGERTIPS!

View and Pay Your Bill

Report Outages and Other Service Issues

Monitor Your Energy Usage

Manage Your Account and Receive Updates

Set Communications Preferences

#### WHAT IS SMARTHUB?

SmartHub is a dynamic new online and mobile account experience that will help you manage your energy use, report outages and pay your bills anytime from anywhere.

#### WHEN CAN I REGISTER MY ACCOUNT ONLINE?

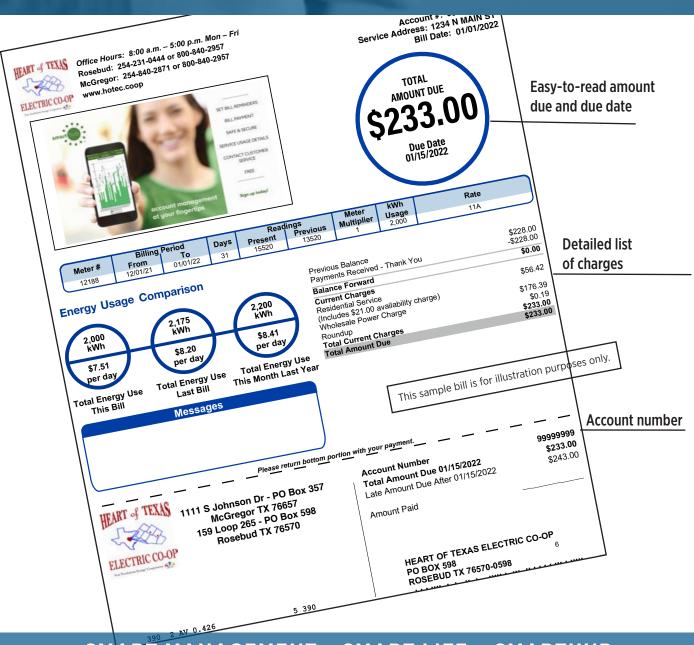

SmartHub is scheduled to go live at hotec.coop in July. You will need your account number to register your account and set up your preferred payment option. Members who sign up for paperless billing in July will receive a \$5 bill credit on their August statement.

#### **HOW WILL IT HELP SIMPLIFY MY LIFE?**

SmartHub allows you to take control of all aspects of your HOTEC account. Pay your bill, check your balance, and contact us with service issues quickly and easily online or on your mobile device!

# NEW BILLING SYSTEM NEW LOOK COMING IN JULY

SMART MANAGEMENT. SMART LIFE. SMARTHUB.

# SMARTHUB IS COMING!

MESSAGE FROM GENERAL MANAGER/ CEO

BRANDON YOUNG

# **Introducing Our New SmartHub Member Services Program**

**DURING THE PAST FEW YEARS**, families and businesses faced many challenges and changes in our daily lives. While many look forward to the return to business as usual, others have adapted to the new normal. These life adjustments have highlighted the value of time—spending it with family and friends—at the top of our list of priorities.

Because we know the value of your time, we are constantly evaluating our business practices, programs and services to make sure that our members are our top priority. As always, we do so with focus and a commitment to exceeding your expectations.

This past year, we have made a positive investment in you here at Heart of Texas Electric Cooperative. This significant change results from listening to you and learning about your priorities and needs.

You may have noticed a SmartHub logo on materials we have published recently. SmartHub is a new innovative tool for managing your electric account. Through SmartHub, you will be able to securely store your payment information to pay your bill with one quick click, view your current and past usage history, contact member services, and report and receive outage updates. All of this will be available from your smartphone or tablet.

What does this mean for you? It means taking back your time. SmartHub will create a one-stop shop that will allow you to efficiently manage your utility service from th comfort of your home or on the go.

Our staff is working hard behind the scenes to make the transition as seamless as possible. Some of those changes include bill format updates, new account numbers and changes to autopay. More information is available on our website.

SmartHub will officially launch in July. We invite you to find more information visiting hotec.coop and clicking on the SmartHub logo. As always, if you have questions during the SmartHub transition, don't hesitate to get in touch. We always look forward to hearing from our members.

# METAL ROOFING

With Mueller, you have access to a wide range of high-quality steel buildings, residential metal roofing, and components. From complex buildings to self-storage units, from living spaces to backyard buildings, Mueller manufactures our products to ensure years of reliability. We invite you to see our many options at muellerinc.com, then call or come by one of our 36 locations.

# GAMBUSIA: SCIENCEPICS | SHUTTERSTOCK.COM. JORDAN: FRANK WOLFE | COURTESY LBJ PRESIDENTIAL LIBRARY. BEETS: KOVALEVA\_KA | STOCK.ADOBE.COM

#### **GAMBUSIA IS GONE**

A tiny Texas fish is among 23 species that federal wildlife officials want to declare extinct.

The San Marcos gambusia, an inch-long fish found only in the San Marcos River in Hays County, was last collected in the wild in 1983. The Fish and Wildlife Service has recommended that it join 21 other animals and one plant in being removed from the endangered species list and declared extinct.

## Gov. Jordan

AMONG BARBARA JORDAN'S many accomplishments was becoming Texas governor for a day 50 years ago this month.

Months before her election to the U.S. House, her colleagues in the Texas Senate unanimously elected Jordan president pro tem. Gov. Preston Smith and Lt. Gov. Ben Barnes both made plans to be out of state June 10, 1972, enabling Jordan to step in as acting governor, making her the first Black woman in the U.S. to preside over a legislative body.

#### **Co-ops Rule**

Electric cooperatives dominated the 2021 J.D. Power rankings for customer satisfaction, with 14 co-ops -including Texas' Magic Valley EC and CoServ—finishing among the top 20 U.S. residential power providers in the annual survey of electric customers.

#### June 17 **National Eat Your** Vegetables Day

We know gardens across Co-op Country produce bounties of amazing crops. But this month we spotlight folks who look beyond cultivated patches for wild edibles. See The Grazing Craze on Page 8.

# "To you, it's the **perfect lift chair.**To me, it's the **best sleep chair** I've ever had."

You can't always lie down in bed and sleep. Heartburn, cardiac problems, hip or back aches – and dozens of other ailments and worries. Those are the nights you'd give anything for a comfortable chair to sleep in: one that reclines to exactly the right degree, raises your feet and legs just where you want them, supports your head and shoulders properly, and operates at the touch of a button.

Our **Perfect Sleep Chair®** does all that and more. More than a chair or recliner, it's designed to provide total comfort. **Choose your preferred heat and massage settings, for hours of soothing relaxation.** Reading or watching TV? Our chair's recline technology allows you to pause the chair in an infinite number of settings. And best of all, it features a powerful lift mechanism that tilts the entire chair forward, making it easy to stand. You'll love the other benefits, too. It helps with correct spinal alignment and promotes back pressure relief, to prevent back and muscle pain. The overstuffed,

oversized biscuit style back and unique seat design will cradle you in comfort. Generously filled, wide armrests provide enhanced arm support when sitting or reclining. It even has a battery backup in case of a power outage.

White glove delivery included in shipping charge. Professionals will deliver the chair to the exact spot in your home where you want it, unpack it, inspect it, test it, position it, and even carry the packaging away! You get your choice of Genuine Italian Leather, plush and durable Brisa<sup>TM</sup>, stain and liquid repellent DuraLux<sup>TM</sup> with the classic leather look or plush MicroLux<sup>TM</sup> microfiber, all handcrafted in a variety of colors to fit any decor. BY SHERYL SMITH-RODGERS

've yanked henbit and chickweed for years from my native-plant gardens, nearly eradicating the weeds that pop up every winter.

If only I'd known that the European species make tasty additions to salads. So I decided in December to let them stay put. Then I'd have some fresh leaves and flowers to toss with spinach, tomatoes and dressing.

Many of the native plants are edible too, like turk's cap, dayflower, wood sorrel and spiderwort. Hold on—eat my natives? The concept boggles my mind. As a Texas master naturalist, I'm familiar with most of the ones that grow in my region. On the other hand, since childhood I've been conditioned to eat foods only bought at grocery stores or intentionally grown in gardens, not picked from a lawn or some wild place.

Then I recall our ancestors foraged to survive. Their hard-

# Pushed along by the pandemic and prices, foraging for wild edibles is a growing trend

scrabble lifestyles make me determined to loosen up. And I am. In March I picked blossoms from our eastern redbud tree and added them to salads. This summer I've been nibbling on turk's cap berries and pink evening primrose leaves. As I learn more about wild edibles, the plants that grow around my yard have taken on a different meaning.

I'm not alone in my new outlook. For a number of reasons, more and more people are hunting for edible plants.

"It used to be just adventurer eaters, foodies and cooks who mainly foraged," says Mark Vorderbruggen, author of an Idiot's Guides book on foraging. "Then the pandemic came, and people got scared about getting food if the markets closed. It made them go outside in search of alternative food sources. Now with inflation, food has become more expensive. People want to know where they can get free nutrition."

8 TEXAS CO-OP POWER JUNE 2022

#### **Cut With Care**

o what makes a wild plant edible? In a nutshell, it's nonpoisonous, palatable and digestible. Many have health benefits too. "In vitamins, minerals and protein, wild food can match and even surpass the nutritional content of our common foods," writes Delena Tull in Edible and Useful Plants of Texas and the Southwest. "Dandelion greens are more nutritious than spinach."

Foragers must always ask for permission before scouring private property. On public lands, it's illegal to take plant materials. Steer clear of toxic areas, like highway roadsides and places frequented by pets.

And some final words of caution: Before eating any wild plant, be absolutely certain of its identity. Read books on the subject, learn some basic botany, take foraging classes and go out with an experienced forager to gain an understanding of what you should and shouldn't eat.

Then start with easy plants, like turk's cap and pecans. As you gain knowledge, add species that you can readily identify. Also, eat wild edibles in moderation and be mindful of possible reactions. For example, if you're allergic to cashews and mangoes, avoid their cousins: evergreen and flameleaf sumacs.

"Nature is a mishmash of greens and browns," says foraging expert Courtney Taylor of Weston, north of Dallas. "To most people, plants all look the same. It takes time, patience and consistency to learn the nuances between them. Wood clover and clover, which are both edible, look similar but have subtle differences."

Taylor, a Grayson-Collin Electric Cooperative member, teaches basic foraging classes and compiled a 60-page e-book on North Texas edibles. In every class, she stresses foraging etiquette.

"Leave an environment better than you found it," she says. "Only harvest what you're going to use. Only take a leaf or two from a small plant. If you take all the leaves, that plant won't go to flower. As a forager you want that plant to be there next year. I believe that conscientious foragers can actually increase an environment's health and wild food populations."

> Depending on the month, Taylor harvests mulberries, persimmons, dewberries, pecans, black walnuts, hackberries and beautyberries among many others-often foraging in her rural neighborhood and along country roads. "The tastiest greens to me are lamb'squarters and chickweed," she says. "I also eat a lot of dandelion leaves for their health benefits. I like to make smoothies with them."

Educating others about useful plants is a top priority for Vorderbruggen, who produces videos, podcasts and presentations on the subject. "Most people assume all

Know what you're picking before you eat it.

Stay off private land unless you have permission.

Don't take plant materials from public lands; it's illegal.

Steer clear of toxic areas, like highway roadsides and places frequented by pets.

Pick up any litter you find.

the itch to forage.

OPPOSITE Wild mulberries can be found all over Texas. Take a foraging class to learn to identify edible plants. LEFT Courtney Taylor is a 20-year foraging expert, especially on North Texas

edibles.

plants are poisonous," says the Houston resident, who holds a master's in medicinal chemistry and a doctorate in physical organic chemistry. "Even people who want to forage and have read the books still have a fear of misidentifying something and dying as a result. My goal is to help them to trust themselves and eat a plant that they've properly identified."

#### Rooted to the Spot

n far North Texas, Kimberly Clark, a member of Fannin County EC, learned to forage by watching YouTube videos and joining foraging groups on Facebook. "Now my two kids like to forage with me on our acreage and in our area," she says. "We harvest elderberry, cattails, water violets, peppergrass and sorrel. My son's favorite is wild carrot, also known as Queen Anne's lace." (Caution: Queen Anne's lace looks similar to two extremely toxic plants: poison hemlock and water hemlock.)

Come midsummer, Tom Mitchell Jr. of Cleburne steers a golf cart around his neighborhood, looking for clusters of ripe flameleaf sumac berries. "They make a great mock lemonade," says Mitchell, a commercial pilot and United Cooperative Services member. "I put the berries in a pot of water and let them sit overnight. Then I strain the pink liquid and add some honey. The lemony flavor comes from the berries' malic acid. I also dry sumac berries, then grind them up to use as a spice."

Last year, forager Racheal Balliu—a Pedernales EC member and registered nurse who lives near Canyon Lake—took some "yard butter" to a party. At first her friends hesitated to sample the creamy condiment, mixed with chickweed, peppergrass, henbit and wild onions. "I've found that people are sometimes nervous to try foraged foods," Balliu says. "But after trying my butter, they loved it. They also love the pesto that I make with chickweed, basil, parmesan and pecans."

Her interest in wild foods has since morphed into a business called Forest Girl Wild American Tea. Her green and roasted yaupon teas are available online and sometimes at farmers markets. "Yaupon holly is the only natural caffeine in North America," she explains. "I hand-pick

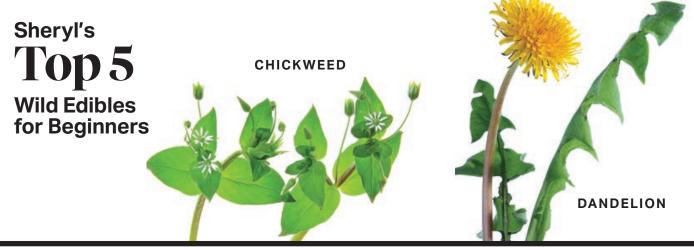

yaupon leaves on family land, wash and air-dry them, and then package the leaves as both tea bags and loose leaf."

In the Rio Grande Valley, wild edibles aren't as easy to find. That's because more than 90% of native habitats have been cleared through the years for agriculture and urbanization. "The nature we see here is more sterilized," says Jackelin Treviño of McAllen. "Buffalo grass and oaks are lovely, but they're not forageable. I see that gradually changing as cities plant more native plants.

"Foragers here are basically limited to private property with permission and conserved areas, where foraging is discouraged," she continues. "When I'm able to forage, my favorite wild edible in the Valley are berries from brasilwood. They look like blueberries, are shiny like grapes and taste like blackberries."

Out west in El Paso, the Chihuahuan Desert would seemingly offer even fewer finds. But outdoorsman James Harris

knows better. For nearly a decade, he's researched the vegetation and wildlife that inhabit the arid region that he's called home all his life. Now he shares his knowledge about wild foods and other survival skills through videos.

"Out here, one of our most plentiful wild edibles are honey mesquite pods and beans," he says. "They're very versatile. You can use them to make small cakes, teas, jellies, jams and energy bars. They also make a good coffee substitute, even though they don't have caffeine."

Prickly pear cacti are also very common, Harris says, and their pads and fruit are edible. "They're a pain to gather because of the thorns, so I always carry tweezers," he says. "Another edible is the banana yucca, which I call the 'supermarket of the desert.' The young flower stalks can be cut and cooked like asparagus. The white flowers are edible. You can also cook the green fruits."

From yuccas to chickweed, I noted a common interest in my conversations with foragers from across the state: They all love getting outside and exploring wild places. As Harris explains, "Being outdoors grounds you closer to the earth. You have a higher appreciation for the seasons and the plants when you interact with nature."

I couldn't agree more.

# Speaking to Children

## Meet the South Texas educator who isn't slowing down in her mission to instill a love of language in bilingual readers

o understand what drives María Alma González Pérez, one must understand her love of language. Because her mother had only a grade school education, González Pérez mostly spoke Spanish—the only language she knew until enrolling in school—with clarity and precision.

"She did not want us mispronouncing words," González Pérez says. "She would say that the proper use of the language was something that defined you as an educated person."

Upon that principle, González Pérez earned a doctorate in education, then became a professor, college administrator, children's book author and, most recently, an entrepreneur—all while advocating for the importance of language. González Pérez, 70, is now a decade into her latest career—a publisher on a quest to bring more Hispanic culture into children's books.

The native of Zapata County, on the border in South Texas, won a prestigious International Latino Book Award in 2021 for her book *¡Todos al rodeo! A Vaquero Alphabet Book.* The children's picture book is the third in her series of what she calls "ABC books," which tell a story through the letters of the alphabet. She uses the genre to infuse Hispanic culture into children's literature to foster bilingual literacy.

It's the kind of book she wishes she had as a young student.

"I was always trying to unravel this mystery called English," González Pérez says. "It was a sink-or-swim approach to learning." Her moment of awakening, she says, came in the eighth grade, when she first enrolled in a Spanish course and received a textbook for that class. "This is the book they should have given me in the first grade," she says. "They did it backwards."

González Pérez's vaquero book teaches children that the American cowboy and the cattle industry itself emerged from the arrival of Spaniards who introduced the horse to North America. Words like "rodeo" and "lasso," the book points out, are Spanish in origin.

The book also draws from the author's own life; González Pérez, a member of Medina Electric Cooperative, comes from a land-grant family whose large property holdings were bestowed on early Texas settlers by the Spanish crown. She grew up on a 1,000-acre ranch that touched the banks of the Rio Grande, so she's familiar with the vaquero way of life. Her Texas roots reach back so many generations that she calls herself a Tejana instead of a Mexicana.

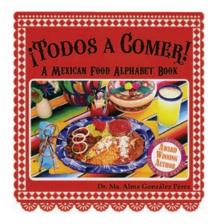

González Pérez frequently uses the Spanish word for courage—coraje—as she speaks. Her cultural awareness in a part of the state where Hispanic culture is the norm gave her the coraje to excel in school even though she had to learn English while she was learning other subjects. And her mother's insistence on excelling gave González Pérez a sense of self, she says. "I never felt that I needed to be anybody else other than who I was."

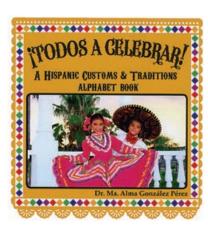

So with a sense of coraje, González Pérez left the cultural comfort of South Texas to master English by immersion. She attended Texas Woman's University in Denton in the 1970s, then "relatively devoid" of Hispanic people, she says.

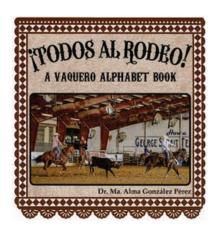

After securing undergraduate and master's degrees, González Pérez returned to South Texas, where she taught, raised a family and eventually attended Texas A&M International University in Laredo for her doctorate. Her dissertation on the relationship between Spanish proficiency and academic achievement among high school graduates in South Texas fueled what would become a lifelong pursuit.

Literacy, her study showed her, extends beyond the pages of books into cultural understanding. It's the context on which idioms are built and understood, and it's the antitoxin of cultural misunderstanding and outright xenophobia.

González Pérez frequently uses the Spanish word for courage—coraje—as she speaks. "I never felt that I needed to be anybody else other than who I was."

iterature, she believes, immerses readers in the experiences of others—puts them in the shoes of protagonists. But as a professor at the University of Texas-Pan American (now UT Rio Grande Valley), González Pérez was frustrated by a lack of culturally relevant Hispanic literature available for her students. They were studying to become bilingual teachers using a curriculum based in English.

"I started gauging them, and that's when I learned that they had not been exposed to any literature written by Hispanic authors," González Pérez says. That sparked something in the professor.

Lino Garcia Jr., a retired UTRGV professor, sees the need for Hispanic stories from Hispanic authors.

"We should be doing that at the pre-K level," he says. "Instead of talking about the Taj Mahal, we should be talking about Spanish missions, about the Camino Real—about things that Hispanic students can relate to. This gives them a sense of identity. This gives them a sense of worth."

González Pérez's first book was ¡Todos a Comer! A Mexican Food Alphabet Book—the best-selling of her series for children. The second book, ¡Todos a Celebrar!, spotlighted Hispanic customs and traditions.

Of course, writing culturally inclusive books is one thing; getting them distributed, González Pérez discovered, was a big, new challenge. So with the help of her three daughters, she launched Del Alma Publications (*del alma* means "of the soul"). An attorney, a business major, and an engineer and graphic designer, Anita Pérez, Maricia Rodriguez and Teresa Estrada, respectively, helped their mother get the

business going in 2008.

"I have a dream team in my daughters," González Pérez says. "I told my daughters, 'Let's play with it for five years. If it flies, great. If it doesn't, nothing was lost but a lot was learned."

It flew.

González Pérez's initial goal was to target South Texas. But her first bulk order of more than 25 books came, instead, from Redondo Beach, California. Next came an order from Philadelphia for several hundred books. The demand was nationwide. Del Alma Publications has shipped thousands of books over the past 14 years—to individuals, schools, libraries, book donors and nationwide book distributors.

But she isn't done yet.

"We've made great strides in meeting the biliteracy challenges of the Hispanic learner," González Pérez says. "However, we still need to write many more books about stories that our children need to read.

"Not only to inform and educate but to help them develop a greater sense of cultural identity and pride."

Enter online to win González Pérez's three bilingual alphabet books, above.

#### Good afternoon,

As a local business, we understand the importance of conserving energy and saving money, particularly in a world of **more frequent ice storms** and wildfires. The past couple years of winter storms have impacted us all. The challenge of keeping our homes warm and secure is always on our minds. And then there is the pain of **skyrocketing fuel prices...** 

**The best windows and doors ensure an extra layer of security** for your family. They'll help retain the climate you pay for by keeping heat in in the winter and heat out in the summer.

If an upgrade to make your home comfy and efficient makes sense, I'm happy to offer you this special reader's discount this month! **Please give my team a call. We'll come work up a** 

price at a time that fits your busy life!

Warmly,

**Steve Johnston**

# Clogged, Backed—up Septic System...Can anything Restore It?

**DEAR DARRYL:** My home is about 10 years old, and so is my septic system. I have always taken pride in keeping my home and property in top shape. In fact, my neighbors and I

are always kidding each other about who keeps their home and yard nicest. Lately, however, I have had a horrible smell in my yard, and also in one of my bathrooms, coming from the shower drain. My grass is muddy and all the drains in my home are very slow.

My wife is on my back to make the bathroom stop smelling and as you can imagine, my neighbors are having a field day, kidding me about the mud pit and sewage stench in my yard. It's humiliating. I called a plumber buddy of mine, who recommended pumping (and maybe even replacing) my septic system. But at the potential cost of thousands of dollars, I hate to explore that option.

I tried the store bought, so called, Septic treatments out there, and they did Nothing to clear up my problem. Is there anything on the market I can pour or flush into my system that will restore it to normal, and keep it maintained?

Clogged and Smelly - Lubbock, TX

**DEAR CLOGGED AND SMELLY:** As a reader of my column, I am sure you are aware that I have a great deal of experience in this particular field. You will be glad to know that there IS a septic solution that will solve your back-up and effectively restore your entire system from interior piping throughout the septic system and even unclog the drain field as well. **SeptiCleanse® Shock and Maintenance Programs** deliver your system the fast active bacteria and enzymes needed to liquefy solid waste and free the clogs causing your back-up.

This fast-acting bacteria multiplies within minutes of application and is specifically designed to withstand many of today's anti-bacterial cleaners, soaps and detergents. It comes in dissolvable plastic packs, that you just flush down your toilets. It's so cool. Plus, they actually Guarantee that it restores ANY system, no matter how bad the problem is.

SeptiCleanse® Shock and Maintenance Programs are designed to work on any septic system regardless of design or age. From modern day systems to sand mounds, and systems installed generations ago, I have personally seen SeptiCleanse unclog and restore these systems in a matter of weeks. I highly recommend that you try it before spending any money on repairs. SeptiCleanse products are available online at www.septicleanse.com or you can order or learn more by calling toll free at 1-888-899-8345. If you use the promo code "TXS16", you can get a free shock treatment, added to your order, which normally costs \$169. So, make sure you use that code when you call or buy online.

# The U.S. Mint Just Struck Morgan Silver Dollars for the First Time in 100 Years!

It's been more than 100 years since the last Morgan Silver Dollar was struck for circulation. Morgans were the preferred currency of cowboys, ranchers and outlaws and earned a reputation as the coin that helped build the Wild West. Struck in 90% silver from 1878 to 1904, then again in 1921, these silver dollars came to be known by the name of their designer, George T. Morgan. They are one of the most revered, most-collected, vintage U.S. Silver Dollars ever.

#### Celebrating the 100th Anniversary with Legal-Tender Morgans

Honoring the 100th anniversary of the last year they were minted, the U.S. Mint struck five different versions of the Morgan in 2021, paying tribute to each of the mints that struck the coin. The coins here honor the historic New Orleans Mint, a U.S. Mint branch from 1838–1861 and again from 1879–1909. These coins, featuring an "O" privy mark, a small differentiating mark, were struck in Philadelphia since the New Orleans Mint no longer exists. These beautiful

coins are different than the originals because they're struck in 99.9% fine silver instead of 90% silver/10% copper, and they were struck using modern technology, serving to enhance the details of the iconic design.

#### Very Limited. Sold Out at the Mint!

The U.S. Mint limited the production of these gorgeous coins to just 175,000, a ridiculously low number. Not surprisingly, they sold out almost instantly! That means you need to hurry to add these bright, shiny, new legal-tender Morgan Silver Dollars with the New Orleans privy mark, struck in 99.9% PURE Silver, to your collection. Call 1-888-395-3219 to secure yours now. PLUS, you'll receive a BONUS American Collectors Pack, valued at \$25, FREE with your order. Call now. These will not last!

FREE SHIPPING! Limited time only. Standard domestic shipping only. Not valid on previous purchases.

MESSAGE FROM GENERAL MANAGER BRANDON YOUNG

#### Natural Gas Keeping Power Prices High

WE ALL KNOW HOW IT GOES in Texas: When the summer temperatures start to soar, the power bill often follows. Running the air conditioner comes with a price, and we can only do our best to soften the blow—by consciously monitoring our consumption and conserving energy.

But this year, forces beyond any of us are poised to make summer electric bills even worse.

Heart of Texas Electric Cooperative has not and is not raising our rates, but the runaway cost of natural gas is having a volatile effect on electric bills across Texas. The cost your co-op pays for wholesale power has been much higher this year, and there's no relief on the horizon.

Since the winter storm in February 2021 that impacted most of our state's grid, prices for natural gas—which fuels about half of Texas' power generation—have risen sharply. Natural gas cost an average of \$1.91 per million Btu in February 2020 but \$4.69 in February of this year—nearly 2.5 times higher with no sign of slowing down in the near future. The Energy Information Administration expects those prices to stay north of \$3.50 through 2023.

That means most electric generation providers are paying far more to generate power—costs that

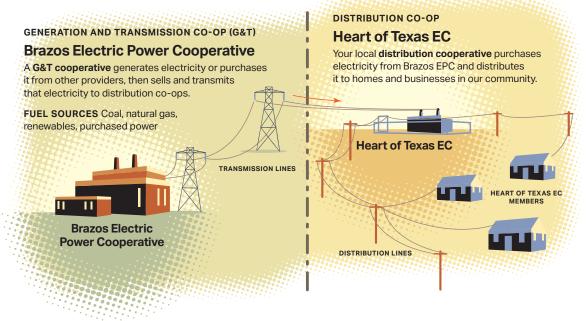

get passed along to Heart of Texas EC and that we unfortunately must pass along to our members.

Don't get me wrong: We're not happy about this either. All of your cooperative's directors and most of its employees, like me, are members of the co-op. Our power bills are impacted by this, too.

As a nonprofit electric cooperative, none of this additional revenue goes to the co-op; it passes right through to our power provider. The increased wholesale power cost on your bill simply ensures that we can continue to pay our bills and provide power to homes and businesses.

We know times are hard right now, and this is the last thing you want to hear as the summer months start to heat up. The cost of everything is on the rise, and we do not know when this inflationary period will end or how much worse it will get before we see improvement.

But by working together as friends, neighbors and colleagues, we've made it through some challenging times over the past couple of years. We'll get through this, too.

#### Manage Your Account Like Never Before With SmartHub

HEART OF TEXAS ELECTRIC COOPERATIVE is preparing to introduce SmartHub, a new member services program that will enhance members' ability to communicate with the co-op. The upgrade will require members who have online accounts to register in the new system. Members who sign up for paperless billing in July will receive a \$5 bill credit in August.

The conversion to SmartHub will take place in July. Your bill date will determine how soon you need to re-register. When you receive your July statement, verify your account number before attempting to register your account, as some members' account numbers will have changed.

#### Important Alert for Auto-Pay Members

Due to payment card industry compliance protocols, the previous auto-pay program does not allow for the transfer of credit or debit card, e-check, or bank draft information to the new system. These protocols are in place to protect your financial information. If you are signed up for automatic payment of your monthly bill, you will need to reenter your payment information. You can do this once you register for your SmartHub account.

If you choose not to set up an online account, you can submit a new autopay agreement. You may complete the form online by visiting our website, hotec.coop/forms, and clicking on Automatic Bill Payment Authorization.

If you want to submit a paper copy, print the Credit Card/Bank Draft Authorization form from our website. Forms are also available at the office, or you can call and request a form to be mailed to you.

#### EBiz Unavailable After June 22

With the upgrade to SmartHub, our online bill pay site, eBiz, will change as well. Our current payment website will be discontinued June 22, and it will take several days to complete the conversion before the new SmartHub online payment site is available. Watch for the latest updates on SmartHub's implementation on our website and Facebook page.

#### New Features Offer Ease of Use

SmartHub has several features that make managing your account much easier. Whether through the web or your smartphone or tablet, you'll be able to pay your bill, contact customer service and get the latest news.

As soon as you log in, you'll be able to view your billing history and make a payment with just a couple of clicks. You'll be able to see your current bill, along with bills from the previous month or year.

Making payments through SmartHub is fast and easy. The first time you make a payment through the web or your mobile device, you'll be able to securely store your payment information for future transactions. The next time you need to pay your bill, it will only take a couple of clicks.

You'll also be able to see important notices with SmartHub. You'll be able to select how you want to be notified about your bill, including through email and text messaging. Other alert options will also be available.

Reporting a service issue is a snap with SmartHub. There's no need to call the office; just let us know about the issue through the app. You can also contact us for member service requests or with any questions you may have.

The new SmartHub program will take the hard work out of managing your account and allow you to swiftly handle account management tasks from the palm of your hand.

# ATTENTION AUTO-PAY MEMBERS!

# **Coming in July!**

If your account is set up for Auto-Pay each month, you will need to register your account in SmartHub and re-enter your Auto-Pay information during the month of July.

If you prefer to submit a paper form, visit our website at hotec.coop/forms and click on Credit Card/Bank Draft Authorization or use the form on the following page.

Members signing up for paperless billing during July will receive a \$5 bill credit in August.

Our online pay site, eBiz, will go offline permanently on June 22.

The new online pay site will be unavailable for several days, and only payments by cash or check will be accepted. Credit/debit cards cannot be processed June 22-27 during the transition. Payments during this time may be made in person or by mail.

Watch for updates on our website, hotec.coop and facebook/hotec.coop.

SMART MANAGEMENT. SMART LIFE. SMARTHUB.

#### If You Currently Use Auto-Pay, You Need To Re-register!

Members may also register online at hotec.coop/form/automatic-bill-pay-authorization.

#### **Congratulations to Scholarship Recipients**

**HEART OF TEXAS ELECTRIC COOPERATIVE** awards scholarships each year to area students whose parents or guardians are members of the co-op. This year the board of directors voted to approve 10 \$1,000 scholarships to be awarded to graduating high school seniors and college students.

Providing these scholarships exemplifies Heart of Texas EC's dedication to two of its guiding principles—Concern for Community and Education, Training and Information.

Congratulations to Peyton Bubert, Matthew Castillo III, Colby Coker, Karianne Hosch, Reed Michna, Graycee Mosley, Summer Newman, Karley Powell, Elisa Ranly and Kade Sebek.

Bubert is the daughter of Anthony and Ashley Bubert of Crawford. She plans to attend Angelo State University.

Castillo is the son of Carmen Castillo of Oglesby. He plans to attend Tarleton State University and pursue a degree in business.

Coker is the son of Calvin and Laura Coker of Rosebud. He plans to attend Blinn Community College, then transfer to Texas A&M University to pursue a degree in agricultural economics.

Hosch is the daughter of Deborah and Rickey Hosch of Temple. She attends the University of Texas at Austin.

Michna is the son of Bobby and Kim Michna of Lorena. He plans to attend Sam Houston State University and major in business.

Mosley is the daughter of Megan Mosley-Mick and Chris Mosley of Troy. After college and medical school, her goal is to become an orthopedic surgeon.

Newman is the daughter of Richard Newman of McGregor. She plans to study to become a dental hygienist.

Powell is sponsored by Cristi and Ronald Jungmann of Rogers. She plans to attend McLennan Community College before transferring to a four-year college to pursue a degree in speech and language pathology.

Ranly is the daughter of Gary and Stephanie Ranly of Temple. While attending Rogers High School, she is also taking classes at Temple College.

Sebek is the son of Matt and Mandy Sebek of Temple. He is pursuing a bachelor's degree in education with the goal of becoming a teacher and coach.

Congratulations to our 2022 scholarship recipients.

#### Education, Training and Information

Cooperatives provide education and training for their members, directors, managers and employees so they can contribute effectively to the development of their cooperatives. Those who are familiar with co-ops can inform the general public, particularly young people and opinion leaders, about the nature and benefits of cooperation.

#### Cooperation Among Cooperatives

Cooperatives serve their members most effectively and strengthen the cooperative movement by working together through local, regional, national and international structures.

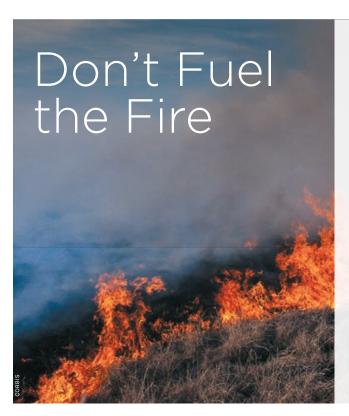

#### **Operation Round Up Awards Funds** to Volunteer Fire Departments

**THE OPERATION ROUND UP** Board of Trustees awarded each volunteer fire department in Heart of Texas Electric Cooperative's service territory a \$1,500 grant in April. The funds were approved by the trust board to help each fire department meet the rising costs of operations. Our area fire departments provide a vital service to our communities.

Volunteers who attended the check presentation included Gary Kleypas, Buckholts VFD; Richard Miller, Oglesby VFD; Bobby and Dona Buster, Jonesboro VFD; Jimmy Jackson, Troy VFD; Gene Sprous, Bruceville-Eddy VFD; Jimmy Jackson, Turnersville VFD; Ray Bickerstaff, Valley Mills VFD; Jerry Wood, Lott and Westphalia VFDs; Randy Phelps, Chilton VFD; Kaleb Miller, Rosebud VFD; Van Smith and Mary Dominguez, McGregor VFD; and Jaime Morris, Speegleville VFD.

Volunteer fire departments not pictured but that also received grants were Calvert, Cameron, China Spring, Clifton, Coryell City-Osage, Crawford, Flat, Gatesville, Golinda, Levita, Lorena, Marlin, Milano, Minerva, Moffat, Moody, Mound, Robinson, Rogers, the Grove and West Shore in Laguna Park.

Wildfires start unexpectedly and move quickly and unpredictably, destroying everything in their path.

If fire is reported nearby:

**Place** vital records and small items of value in your car and park it facing the direction of escape. Heed evacuation orders.

Clear a firebreak around buildings.

Shut gas off at the meter and turn off propane tanks.

Leave the electricity on, especially if it powers a well.

**Turn on** sprinklers. Wet down the house and shrubs close to structures.

#### Prevention:

Mow grass short. Rake leaves. Clear away debris.

**Keep** hay bales and firewood away from structures and electric lines.

Make a family evacuation plan. Have an inventory of home valuables in a fireproof box.

Heart of Texas EC encourages you to always practice safety.

#### **Prepare for Summer Storms**

**THE SUMMER MONTHS** ahead make conditions right for dangerous storms, and hurricane season kicks off June 1.

These weather events can cause destruction to Heart of Texas Electric Cooperative's system, but crews are standing by to respond should power outages occur.

When major storms knock out power, line crews take all necessary precautions before they get to work on any downed lines. You should also practice safety and preparedness to protect your family during major storms and outages.

#### The Federal Emergency Management Agency recommends preparing for storms and other disasters with these basic steps:

Stock your pantry with a three-day supply of nonperishable food, such as canned goods, energy bars, peanut butter, powdered milk, instant coffee and water, and other essentials like diapers and toiletries.

Confirm that you have adequate sanitation and hygiene supplies, including towelettes, soap and hand sanitizer.

Ensure your first-aid kit is stocked with pain relievers, bandages and other medical essentials, and make sure your prescriptions are current.

Set aside basic household items you will need, including flashlights, batteries, a manual can opener, and a battery-powered radio or TV.

Organize emergency supplies so they are easily accessible in one location.

In the event of a prolonged power outage, turn off major appliances, TVs, computers and other sensitive electronics. This will help avert damage from a power surge and will also help prevent overloading the circuits during power restoration. Leave one light on so you will know when power is restored. If you plan to use a small generator, make sure it's rated to handle the amount of power you will need, and always review the manufacturer's instructions to operate it safely.

Listen to local news or a weather radio for storm and emergency information, and check Heart of Texas EC's website for power restoration updates.

After the storm, avoid downed power lines and walking through flooded areas where power lines could be submerged. Allow ample room for utility crews to safely perform their jobs, including on your property.

Planning for severe storms and other emergencies can reduce stress and anxiety caused by weather and can lessen the impact of a storm.

#### Restoring Power Safely and Efficiently

FOR MOST Heart of Texas Electric Cooperative members, outages are rare and only last a few hours. But when major storms impact our area, extended outages are unavoidable. Heart of Texas EC is ready to restore power as safely and efficiently as possible.

When it's safe, our crews start by repairing power lines and equipment that will restore power to the greatest number of people in the shortest time possible.

This process begins with repairs to the larger main distribution lines that service a great number of homes and businesses. After that, crews work on tap lines, which deliver power to transformers. Finally, individual service lines that run between transformers and homes are repaired.

We can't control the weather, but we can prepare for it. Heart of Texas EC keeps a supply of extra utility poles, transformers and other equipment on hand so we can quickly get to work in the event of an outage. When widespread outages occur, multiple crews will be out in the field working to repair damage at multiple locations. We also coordinate with nearby co-ops to bring in additional crews when necessary.

# Use Caution With DIY Electrical Work

**WITH FOLKS SPENDING MORE** time at home, more and more homeowners have been inspired to tackle do-it-yourself projects.

Before you dive in, you should know that thousands of people in the U.S. are critically injured and killed as a result of electrical fires and accidents in their own homes every year, according to Electrical Safety Foundation International.

Data from the U.S. Consumer Product Safety Commission show that there are nearly 400 electrocutions in the U.S. each year. About 15% of electrocutions are related to consumer products. Wiring hazards accounted for about 14% of those deaths.

Additionally, an estimated 360,900 residential building fires are reported to U.S. fire departments each year, and they caused an estimated 2,495 deaths, 13,250 injuries and \$7 billion in property losses. The leading cause of the largest fires was electrical malfunction.

Homeowners taking on DIY projects are especially at risk when they do not have the training or experience needed to safely perform home electrical work. Working with electricity requires planning and extreme care to prevent injury, death and dangers down the road.

ESFI and Heart of Texas Electric Cooperative recommend hiring a qualified, licensed electrician to perform any electrical work in your home.

#### However, if you do decide to do it yourself, consider the following safety tips:

- ▶ Make an effort to learn about your home's electrical system so that you can safely navigate and maintain it.
- ▶ Never attempt a project that is beyond your skill level. Knowing when to call a professional may help prevent electrical fires, injuries and fatalities.
- ▶ Always turn off the power to the circuit that you plan to work on by switching off the circuit breaker in the main service panel.
  - ▶ Be sure to unplug any lamp or appliance before working on it.
- ▶ Test wires before you touch them to make sure that the power has been turned off.
- $\blacktriangleright$  Never touch plumbing or gas pipes when performing a do-it-yourself electrical project.  $\blacksquare$

NEW LOW PRICE

ONLY \$14999 Each When You Buy a Pair

PLUS FREE SHIPPING Limited Time Only!

How can a rechargeable hearing aid that costs only \$14999 be every bit as good as one that sells for \$2,400 or more?

The answer: Although tremendous strides have been made in Hearing Aid Technology, those cost reductions have not been passed on to you.

**The MDHearingAid® VOLT** uses the same kind of technology incorporated into hearing aids that cost thousands more at a small fraction of the price.

Over 600,000 satisfied MDHearingAid customers agree: High-quality, digital, FDA-registered **rechargeable** hearing aids don't have to cost a fortune. The fact is, you don't need to spend thousands for a hearing aid. MDHearingAid is a medical-grade, digital, rechargeable hearing aid offering sophistication and high performance; and works right out of the box with no time-consuming "adjustment" appointments. You can contact a licensed hearing specialist conveniently online or by phone — even after your purchase at no cost. No other company provides such extensive support. Now that you know...why pay more?

## **Doctor's Orders**

UT medical school faculty left Galveston to provide aid during World War I

BY MARTHA DEERINGER • ILLUSTRATION BY DANA SMITH

WHEN DR. ETHEL LYON HEARD returned to Texas after serving overseas with the Red Cross during World War I, she was holding tightly to the hand of a 3-year-old orphan from France named Jean Thibaut. After the child's house was nearly destroyed by a mortar in 1918, he was discovered in a back room the following day and brought to the hospital where Lyon Heard worked.

Before the war, Lyon Heard taught classes in hygiene and child care at the University of Texas' medical school in Galveston. Making space in her life for a child orphaned by war was just one of the countless acts of service and moments of bravery undertaken by UT faculty when the U.S. joined the war effort.

"These men and women sacrificed their lives and future professions by en-

listing in the war effort in Europe," says Dwayne Jones, director of the Galveston Historical Foundation. "The effects of the war redirected each life and altered the direction of health care forever."

Known today as the University of Texas Medical Branch, the school started in October 1891 with 13 instructors, 23 students and one building.

The mettle of the school was tested right away when the devastating 1900 Galveston hurricane struck. Much of the city was destroyed, but Galveston doctors led recovery efforts.

When the U.S. formally entered World War I in 1917, new and catastrophic forms of combat—trench warfare and chemical and biological weapons—required increased medical care for troops. The situation worsened when the Spanish

flu pandemic swept across the battlegrounds of Europe, killing thousands in just a few days. The American Expeditionary Forces sent out an urgent call for physicians, medical faculty and medical students to assist in the war effort.

The Council of National Defense urged medical students to stay in school and faculty to continue their critical teaching duties. But that didn't stop some of UT's medical personnel, who joined personnel from other leading U.S. universities in enlisting.

Lyon Heard's husband, Dr. Allen George Heard, adjunct professor of pediatrics, joined the medical corps and was assigned to British forces in England. Wounded twice, he received two citations for "conspicuous bravery" in action on the battlefields of France.

Dr. Herbert Lee McNeil, an assistant professor of clinical pathology, was assigned to oversee a hospital with 4,000 patients, later serving on the front lines. Dr. Estill Lee Rice was business manager of the school's medical magazine as a student. He served aboard the USS Nicholson, where he led a rescue mission to treat sailors injured in a German U-boat attack. Dr. Jess Autry Flautt was an instructor in obstetrics and gynecology before enlisting in the Navy Medical Corps on the day after the U.S. declared war. He rescued men from a ship loaded with explosives.

In November 2019, UTMB unveiled a Texas Historical Commission marker to honor the extraordinary contributions of eight members of the school's faculty and 11 students who served during the war effort. Some of the physicians sacrificed their hard-earned professional positions, and in some cases their lives, to serve.

Dr. Ben Raimer, UTMB's president, hopes the marker inspires today's physicians. "The physicians honored on the new historical marker represent service before self, which is what we continue to instill in our students today."

Busy day? No need to sweat it with these stress-free dishes

BY MEGAN MYERS, FOOD EDITOR

Quick and easy dinners are the backbone of our meals. One of my favorites is a stir-fry—you can throw almost anything you have on hand in, and less than 30 minutes later you have a full meal. This beef and green bean stir-fry is a go-to in my family, especially when we have lots of green beans from the garden or tucked away in the freezer. If you like it spicy, add your favorite hot sauce to the dish.

#### Beef and Green Bean Stir-Fry

1 pound ground beef

1 pound green beans, trimmed

3 tablespoons soy sauce

2-3 cloves garlic, minced

1 tablespoon grated fresh ginger

1-2 teaspoons honey

Crushed red chile flakes (optional) Cooked rice, to serve

1. In a large sauté pan over medium-high heat, cook the ground beef until browned, breaking into pieces as it cooks. Drain excess grease if desired.

2. Stir in the green beans and cook for about 5 minutes, until beans are bright green and crisp-tender.

3. Whisk together soy sauce, garlic, ginger and honey, then pour into sauté pan. Cook another 2–3 minutes, until heated through, stirring to coat. Finish with chile flakes if desired and serve with rice.

#### SERVES 4

Follow along with Megan Myers and her adventures in the kitchen at stetted.com, where she features a recipe for Stuffed Shells With Chicken.

#### Spaghetti Carbonara

LINDA HARDWICK HOUSTON COUNTY EC

Carbonara is the ultimate comfort food and easier than you might think. This version brings in heat with crushed red chile flakes, so add according to your tastes.

1 pound spaghetti or other pasta

- 4-6 slices bacon, chopped
- 5-6 cloves garlic, minced
- 1 teaspoon crushed red chile flakes, or to taste

1/2 cup dry white wine

2 eggs

3/4 cup grated Parmesan cheese

Salt and pepper

- 2 tablespoons chopped fresh parsley (optional)
- 1. Bring a large pot of salted water to boil and add pasta, cooking according to package instructions. Reserve ½ cup pasta water and drain pasta, setting aside to keep warm.
- **2.** While the pasta cooks, in a large frying pan over medium heat cook bacon until crisp. Remove bacon and set aside.
- **3.** To the same pan, add garlic and red chile flakes and sauté for 1 minute, then add white wine, scraping up any stuck bits on the bottom of the pan.
- **4.** Whisk together eggs and Parmesan, then add pasta, egg mixture, bacon and reserved pasta water to the frying pan, tossing with tongs to mix together and create a creamy sauce. Add salt and pepper to taste, and serve with parsley.

SERVES 6

\$500 WINNER

#### Eggplant Pizzettes KAY LEUSCHNER

KAY LEUSCHNER NUECES EC

Quick, easy and filling, this is a twist on standard eggplant Parmesan. Serve it as is for a lighter meal or add to a dish of pasta with extra sauce.

SERVES 4

1/2 teaspoon dried oregano
1/2 teaspoon dried basil
1/2 teaspoon garlic powder
1/3 cup grated Parmesan cheese
1/4 cup mayonnaise
1 eggplant, cut into 1/2-inch slices

1/2 cup breadcrumbs

- 1 jar (26 ounces) spaghetti sauce
- 1 cup shredded mozzarella or other cheese
- **1.** Preheat oven to 425 degrees. In a shallow bowl, combine breadcrumbs, spices, garlic powder and Parmesan.
- 2. Spread a thin layer of mayonnaise on both sides of eggplant slices. Dip each slice into breadcrumb mixture, pressing gently to adhere the coating to both sides.
- **3.** Arrange eggplant on an ungreased rimmed baking sheet and bake 15 minutes or until tender.
- **4.** Remove from oven and reduce temperature to 375 degrees. Spread each eggplant slice with a dollop of spaghetti sauce and top with mozzarella. Return pan to the oven for 10–15 minutes or until cheese is melted.

**HOLIDAY SIDES** DUE JUNE 10

We know there's pride in the sides at your holiday feast. Submit your recipes on our website by June 10 for a chance to win \$500.

#### Zuppa di Ceci SIMONA CUDE BANDERA EC

This easy dish—the name means chickpea soup—gets a burst of vibrant flavor from lemon juice and capers. Cude recommends mashing some of the chickpeas before serving for a creamier soup.

2 tablespoons olive oil 1/2 onion, finely chopped 3 cloves garlic, minced

1 medium golden potato, diced 1 can (15 ounces) chickpeas, drained and rinsed

Pinch crushed red chile flakes

- 3 cups vegetable broth
- 1 teaspoon salt
- 1/2 teaspoon pepper
- 2 tablespoons lemon juice
- 2 cups croutons, divided use
- 2 tablespoons drained capers (optional) Chopped fresh parsley (optional)
- 1. In a large soup pot over low heat, heat oil. Add onion and garlic and cook 2 minutes. Add potato and cook another 2 minutes.
- 2. Stir in chickpeas, chile flakes, broth, salt and pepper. Raise heat to medium-high and bring to a boil, then reduce to low and cook 20 minutes, stirring occasionally.
- 3. Remove from heat and stir in lemon juice. Taste and adjust seasonings if desired.
- 4. Add 1/2 cup croutons to each of 4 bowls and ladle soup over the top. Top with capers and parsley, if using.

SERVES 4

#### Batching for Busy Da<u>ys</u>

BY MEGAN MYERS

You can freeze cooked beans and grains, like rice and quinoa, for easy use later.

- 1. Cook as usual, doubling or tripling the recipe for larger batches.
- 2. Let cool completely. Cool grains quickly by spreading onto a large sheet pan.
- 3. Scoop into freezer-safe bags or containers in 1- or 2-cup increments. Remove as much air as possible, then seal, label and store in the freezer.
- 4. Thaw overnight in the refrigerator or more quickly in a bowl of warm water; or add to your favorite soups while frozen.

#### SACRED STONE OF THE SOUTHWEST IS ON THE BRINK OF EXTINCTION

enturies ago, Persians, Tibetans and Mayans considered turquoise a gemstone of the heavens, believing the striking blue stones were sacred pieces of sky. Today, the rarest and most valuable turquoise is found in the American Southwest—but the future of the blue beauty is unclear.

On a recent trip to Tucson, we spoke with fourth generation turquoise traders who explained that less than five percent of turquoise mined worldwide can be set into jewelry and only about twenty mines in the Southwest supply gem-quality turquoise. Once a thriving industry, many Southwest mines have run dry and are now closed.

We found a limited supply of turquoise from Arizona and purchased it for our **Sedona Turquoise Collection**. Inspired by the work of those ancient craftsmen and designed to showcase the exceptional blue stone, each stabilized vibrant cabochon features a unique, one-of-a-kind matrix surrounded in Bali metalwork. You could drop over \$1,200 on a turquoise pendant, or you could secure 26 carats of genuine Arizona turquoise for just \$99.

Your satisfaction is 100% guaranteed. If you aren't completely happy with your purchase, send it back within 30 days for a complete refund of the item price.

Jewelry Specifications:

• Arizona turquoise • Silver-finished settings

#### **Eruption Evidence**

Drive into the Paisano Pass Volcano in far West Texas to view prehistory

BY CHET GARNER

**IF I CLOSE** my eyes to imagine a volcano, I see a Polynesian island with palm trees, beaches and an endless ocean. I definitely don't imagine the cactus-filled landscapes of West Texas.

Yet there I was, standing on the shoulder of U.S. Highway 90, halfway between Alpine and Marfa, staring at the Paisano Pass Volcano, which—fortunately for visitors—has been dormant for about 30 million years.

The drive west from Alpine to the ancient site was impressive. Red cliffs and strange rock spires on each side of the road made me feel like I was traveling back to the Cretaceous Period. Honestly, I wouldn't have been surprised if a T. rex had crossed the road in front of me. I crested a hill and dropped into a valley, where I pulled into a roadside park to read an educational panel about the lava-formed landscape.

All around me were colorful cliffs, knobby boulders and crag-covered mountains that were formed during the Oligocene Epoch, 23–33 million years ago. Dinosaurs were extinct then, but giant mammals walked the earth, including 18-foot-tall beasts that looked like a mix between horses and rhinos. It was during this era that the Paisano Pass Volcano exploded and then collapsed back onto itself, leaving a 3-mile-wide caldera that stretches as far as you can see from the small park.

Geologists come from all over the world to study this volcano because it exposed layers of rock normally hidden miles below the surface of the earth. The Big Bend is still tectonically active and has even experienced violent earthquakes as recently as 1998. While another volcanic eruption is unlikely, I never say never in Texas. And so I promptly got back in my truck and continued down the road.

ABOVE Chet studies a roadside panel depicting the history and geology of the Paisano Pass Volcano.

Chet vs. the volcano: It's not a movie, but it is a video on our website. Watch all his Texplorations on *The Daytripper* on PBS.

#### Pop's Light Touch

A keepsake reminds a daughter of her father's illuminating ways

BY BABS RODRIGUEZ ILLUSTRATION BY NAVINA CHHABRIA **MY FATHER** was always telling someone to turn out a light.

Except when he was telling one of his five children to turn one on.

"Time for bed, turn out your light."

"Turn out the light you left on in the bathroom."

"Turn on your desk light, you'll ruin your eyes."

A military man who ran a tight ship at home, Pop had a sixth sense when it came to knowing who had left an unoccupied room without flipping a switch or who was reading in the dark.

I think about him whenever I set up the furnishings in a new household because he taught me the power of light to set a mood. He had strong opinions about which combination of lamps would generate the best conversation or encourage lingering over dinner or—with a measured flipping of switches—not so subtly end an evening.

For my 13th birthday, I was allowed to host my very first boy-girl fiesta, made yet more festive by the number of string lights he hung in the backyard trees. However, that gesture may have been less about mood setting and more about oversight. That was definitely how he used the porch lights, flashing them on and off during my high school years and sending clear messages to any one of us daughters hovering outside with a date for what he considered too long.

Maybe his time on the air base or studying the lighted dials in a bomber's cockpit made him keenly attuned to messaging via lighting, but he never bought a lamp or a fixture without some research. Except for one.

Once, at an antiques show, he impulsively purchased a tiny brass lamp. He called it a fairy lamp, although it looked nothing like the glass Victorian-era candle lamps of that name. It was charming, with signs of the maker's hand in the unpolished brass base and a thin metal shade that looked like a pointed gnome's cap.

When he bought it, I was sad that the lamp's wiring was so dangerously undone that there was no doubt it was a fire hazard. And while he forbade me from ever actually using it, I kept that lamp in my room, imagining the places it might have illuminated in years past.

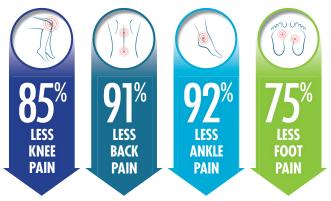

Pop had it rewired for me when I left for college, and it's traveled with me around the world. It is the most meaningful gift I ever received, but in case the metaphor eluded my young self, he included a card: "If you get homesick, Daughter, know I've always left a light on for you."

I think of him every time I switch it on, but only after I've turned out all the lights I'm not using. ■
